

# TOOLS FOR DATA-DRIVEN STRATEGY SELECTION

## TOOLS FOR DATA-DRIVEN STRATEGY SELECTION

Strategies to Increase Opioid Overdose Prevention Education and Naloxone Distribution (OEND)						
Strategy and Venue	Current Activity	Size of Gap (Current Activity vs. Need)	Feasibility in <12 Months	Impact on Overdose Deaths	Potential reach with underserved populations	Priority Score
From the <a href="#">ORCCA menu</a> , brainstorm possible strategies to meet the community OEND goals. Record all strategies in this column.	Briefly summarize current activity in your community.	0. None 1. Small 2. Medium 3. Large	0. Extremely low 1. Low 2. Medium 3. High	1. Low 2. Medium 3. High	1. Low 2. Medium 3. High	Add previous four columns. If any column contains 0, priority score is 0.
Strategies to Enhance Delivery of MOUD Treatment, Including Agonist/Partial Agonist Medication						
Strategies to Improve Prescription Opioid Safety						

# TOOLS FOR DATA-DRIVEN STRATEGY SELECTION *(cont'd)*

## ORCCA Strategy Selection Tool

What is the most urgent priority in your community regarding opioid overdose prevention?		What data do you have to inform your choice?	
List a potential strategy from the <a href="#">ORCCA menu</a> that your community wants to implement.		What data do you need to inform your choice?	
Higher risk population prioritized:		What technical assistance and training resources do you think may be needed?	
Setting engaged:		Who should be at the table to plan and advance this strategy?	
What resources would be helpful as you plan and advance implementation?
